

For a complete and secure setup of eduroam, please install and configure the corresponding app by using your user account.

Setting up eduroam in 3 steps

1. Establish a network connection (via LAN, wireless LAN or mobile data)
2. Download the app or open the website:
 - (a) **Android/iOS:** Install the **easyroam** app from the Google Play Store/Apple App Store, select university of Bamberg as organisation, log in with your user account and press **Connect my phone**

- (b) **Windows/Linux:** Open **www.easyroam.de**, select university of Bamberg and log in with your user account. Then download the installation file via the **Download for desktop** icon
 - (c) **macOS:** like (b) then select **manual options** and download profile file **Mobile-Config (Apple)** name it **eduroam** and then install.
3. Connect to **eduroam**: Select the **eduroam** WiFi network within internet settings and connect.

You can also use eduroam for free internet access at other universities and research institutions worldwide.
